

Reader Card in the Research Library of Tomsk State University

A Reader Card is a plastic card that is issued when registering in the library.

There are two types of Reader Cards in the Library – Basic and Optimum each implying different range of services. The reader chooses the type of a Reader Card. There is an infographic “How do I choose a Reader Card?” (<http://lib.tsu.ru/en/reader-card-options>) that facilitates the choice.

To register and get a Reader Card one should come to the library in person. It is not possible to issue or renew a Reader Card by correspondence.

It is not allowed to transfer own Reader Card to other people; the owner is responsible for the use of his/her Reader Card.

A Reader Card is issued by the Reader Registration Service. It is required to have a student’s ID/TSU ID (or a certificate) issued by TSU Department of Human Resources. If you have lost your reader card please contact the Reader Registration Service or the Delivery Desk to get your Reader Card locked and/or issue a new one.
